

Evaluation of Erasmus+ project

Voices of Change: Empowering Youth Through Digital Storytelling (V.O.I.C.E.)

KA152YOU Professional Development Activity 13 till 20 of April 2026

With this evaluation letter we would like to reflect on the project VOICE that took place in Riga, Latvia on April 2026.

Our participants gained practical skills in digital storytelling, including narrative building, video production and responsible media creation. They also deepened their understanding of how digital content can challenge stereotypes, promote inclusion, and encourage active citizenship. Working in international teams strengthened their communication skills, cultural awareness, and confidence in expressing their ideas.

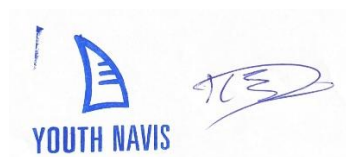

The program was well-organized, inclusive, and supportive. The activities encouraged meaningful reflection on social issues and gave participants the opportunity to create impactful stories connected to their own communities. Despite differences in digital experience and the intensity of the creative process, the group adapted well, supported one another, and completed their tasks with enthusiasm. We met several new organizations. With them we shared our knowledge and ideas during activities and later in the free time, made stronger bonds between our organizations that will for sure give us and our target groups more possibilities in the future.

We are very pleased that we took part in this project and consider it to be a successful one. The project's goals were achieved, and the results will soon be disseminated on the local level. We are grateful for all the support and experience our organization gained along the way. We are looking forward to future collaborations and would be glad to be partners again.

The hosting organization has always been in contact with each partner and accordingly with us as well. Before the main project there have been several online meetings about the organizational stuff and pre-departure possible issues. Also, there were several platforms that were used for whole team's communication: Facebook (messenger), e-mail, WhatsApp. Any problems that participants had during the project were easily and quickly solved. This partnership was collaborative and successful.

Closing we would like to thank all the partner organizations and the participants for their efforts during the program.
